Business intelligence

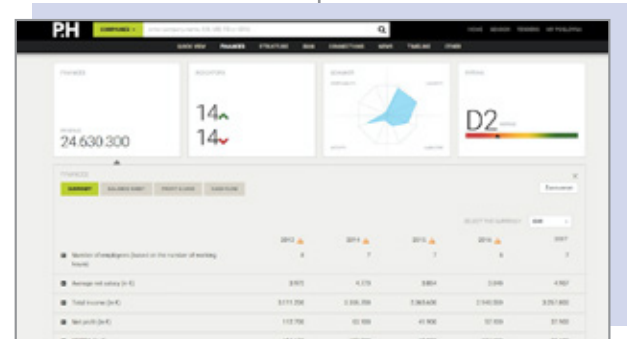

WITHIN A BUSINESS INTELLIGENCE SOLUTIONSE

We provide various tools and information to improve and optimize decisions and performance.

We gather and generate historical, current, and predictive views of business operations, most often using data that has been gathered into a data warehouse. As well we can develop Self-service business intelligence (SSBI) system, which involves the business systems and data analytics that give business end-users access to an organization's information.

TECHNOLOGIES USED:

ASP.NET MVC, C#, microservices , OracleDB, MongoDB, javascript/jquery, Charts - highcharts.js, animated charts d3.js
